"An official record of land ownership, the value and quantity of land in a jurisdiction of the country concerned" is called

cadastre. (Land Administration and Management by Baburam Acharya-B.S. 2077 Mangshir)

KEY WORDS:

Cadastre, Land Code 1954, Datum, Surveying, Digital Cadastre, 2D Cadastre, 3D Cadastre, LIS, Land Parcel, Cadastre Principle and Statistics

ABSTRACT:

The solution of issues raised in the management of land in different sectors for different purposes can be solved on the basis of the jurisdiction of related country concerned. This paper mainly focuses on the explanation about the development in cadastral system from traditional system to present (digital system) in Thailand. So, we have gathered as much as many trending information about the cadastral system in Thailand from different articles, references and research papers published in different websites in different time series. All the legal/illegal land right issues faced by Thai people has been handling by the Department of Land (DOL) under the Land Code 1954 of the Ministry of Interior of Thailand.

Questions about surveying?

Development & Permitting

Surveying

Below you will find answers frequently asked questions regarding land surveyors, land surveys and records.

Can the City of Portland help me?

The city does not perform survey work on private property. If you want your property surveyed, you must hire a private land surveyor.

Who can legally perform a land survey?

In the State of Oregon only a Professional Land Surveyor (PLS) can legally assume the responsibility for a land survey. The Professional Land Surveyor is an individual whose highly specialized background, training and skills have been rigorously examined and who has been licensed by the State of Oregon to practice Land Surveying

Where can I find a Surveyor?

There are several different options for locating a PLS:

- ► The yellow pages (Surveyors-land) and the internet should have listings of surveyors in the Portland area.
- Many surveyors are found through the personal recommendations of satisfied clients, or through attorneys, real estate companies and title companies who frequently handle real estate transactions.
- The Oregon State Board of Examiners for Engineers and Land Surveyors, is the licensing agency for Engineers and Land Surveyors. As such they maintain a list of Licensed Professional Land Surveyors throughout the state. Select "Find a Licensee" to begin your search. Be sure to select "Professional Land Surveyor" under license type, and you will generate a much more manageable list if you limit the search by city and state.
- ▶ The Professional Land Surveyors of Oregon (PLSO) also maintains a directory of surveyors. Check the services directory in their web page for more information.

About us

Background of the Valuers Association of Thailand

The Deputy Director General of the Land Department, Mr. Siri Kawalinsarit, attended on behalf of the Interior Ministry at First Asean Valuer Congress in Kuala Lumpur, Malaysia in 1985 at which there were five countries of the Asean then.

At the conference, it was decided to form Asean Valuers Congress. The Valuers Association of Thailand also was organized to support and coordinate with the Asean Valuers Congress to produce quality resources and development of valuation industry in Thailand.

The Valuers Association of Thailand was formed with cooperation from the Land Department, other related governmental agencies, financial institutes, professional associations, and educational institutions. The establishment of the Thai Valuers Association was established on 30 January 1986 and registered the association on 30 July 1986 with the main objective to promote personnel to develop the valuation profession with cooperation of the Asean Valuers Associations or other institutions with similar interest both domestic and international. Supporting research and distributing information and organizing educational seminar in valuation of property, providing advices and considering disputes in valuation related issues among members and related agencies, establishing and enforcing rules, regulations, and etiquette for the valuation profession.

THE 2023 COSTS OF CONSTRUCTIONS

FOR

THE REPLACEMENT COST NEW

In order to standardize the bases of calculating "replacement cost new" in valuing properties by the Cost Approach to Value, the following annual standard construction costs were recently set forth. This is considered an estimate. Adjustment to specific conditions can be made to suit each property.

Costs of constructions are in Baht/sq.metre. The costs consist of costs of building materials for structural, architectural and system works, labour costs, operational costs and contractor's profits as well as the Value Added Tax (VAT) of 7% and professional premiums of 0.96%. No inclusion is extended to interests, project management costs, design, sale costs and the like which are not directly related to the construction.

This is an effort which has been conducted on annual basis since 2000. A working group of valuation experts was appointed by the Valuers Association of Thailand to work out costs of these constructions.

In 2023, it is expected that other types of buildings will be added onto this standard costs. In addition to costs per sq.metre, the costs will be divided into different stages of construction works such as piling, structure, system works, and architectural finishing.

Note: 0.092903 sq.metre 1 sq.feet

> Baht 33 approximately US \$ 1

See currency conversion at www.bot.or.th

Standard Costs of Construction for valuation purposes was recently announced. Construction costs for wooden housing have increased for some 6%, June 2023. However, for most of the concrete construction with stell as an integral part of the structure, costs were decreased for some 6-8% in the case of tennis courts, on-ground parking lots as well as warehouses. Costs of construction of shophouses and underground parking were decreased for 3-4%. However, in the case of high-rise buildings, prices were decreased insignificantly. June 2023, most building materials have stayed at the same price except steel which have had an 8% increase in price. However, this will not contribute much to the overall construction prices at large.

Monthly Forums

Community

In Thailand, Thai Appraisal and Estate Agents Foundation and Thai Real Estate Business School are among most active real estate - related organizations who organize monthly forums, seminars and training in real estate very frequently. Their events and activities have been welcomed by the public such as real estate industrialists, related professionals, bankers and financiers, local, provincial and central government officers as well as investors, home buyers, and other interested persons.

These events are considered the continuing professional development (CPD) programs. Those participants at events are acknowledged with the points of participation. Their participation is also considered contribution for professional development which will be beneficial for the participants themselves, the industries and the public who uses professional services at large.

Each hour of participation is considered 1 CPD point or hour. For example, participation at a month forum (13:00 - 17:00) will receive 4 CPD point. In a case of a one-day seminar, one will earn 6-8 CPD points depending on the duration of the seminar or conference.

This is an effort to acknowledge professionals who realize the value of the CPD. Professional organizations can requested for detailed participation of its members at our events for accreditation by the consent of the participants. The extensive list of over participants are as follows:

Click here to thai version

There are now 78 SEC listed valuation firms for public purposes. However, altogether, there are some 150 firms with some 4,000 valuers/surveyors. There are also some 300 government assessors

Comments: Not really regulated only for listed companies valued for public purposes.

FIND A VALUER

Become a Registered Valuer

To work as a valuer in Queensland you need to apply for and be registered with the Valuers Registration Board of Queensland. The Board recognises certain undergraduate and post-graduate educational qualifications.

- Make a payment
- Registration standards
- Renewal of registration
- Apply for restoration of registration

Anti-Money Laundering Law

in Thailand

THAILAND'S ANTI-MONEY LAUNDERING LAW

In the light of the proliferation of illegal activities involving large sums of money, Thailand's legislative body has implemented a comprehensive anti-money laundering law.

The Anti-Money Laundering Act was passed in March of 1999 with the aim of eradicating the drug trade, as well as combating other activities like corruption, fraud and prostitution.

Recent amendments to the Act were made in March 2008, broadening the overall scope of criminal liability and increasing powers to conduct investigation and seizures. The amendments can also be seen as an attempt to address the issue of perceived government corruption.

The Anti-Money Laundering Prevention and Suppression Office ("AMLO") established under the Act, has confirmed cooperation from financial institutions in reporting potentially illegal transactions. However, AMLO has also reported the number of transactions previously subject to mandatory reporting under the Act have decreased sharply through time. This may be an indication that suspect transactions previously made directly with reputable financial institutions are now being divided into in smaller, more diversified amounts or transmitted through other methods entirely.

Get your license: Real estate brokers

Learn the requirements and how to apply for a real estate broker license.

Who needs a license?

Anyone who acts on behalf of a real estate firm to perform real estate brokerage services under the supervision of a managing broker.

How to apply

Follow the steps below to get your real estate broker's license.

1. Meet the requirements

To qualify for a license, you must:

- · Be at least 18 years old.
- Have a high school diploma or equivalent.

X

There are now some 10,000 who identify themselves as brokers in Thailand and belong to real estate brokers firms. However, all can be brokers with no control.

Comments: Not regulated for brokers. TPQI just set some qualification. And the AMLO just requires brokers to report the transaction. Not to regulate them.

8. Recommendations

What is Professional Indemnity Insurance? Professional indemnity insurance (PI) protects professionals from financial loss following a claim by dissatisfied client, and covers the Real Estate Agents legal defence costs, and damages payable.

Men are created equal.

(no godfather)

We need a democratic real estate organization where all can join without segregation.

For example, an ASEAN Brokers Alliance where all brokers associations from all ASEAN countries can join equally.

If NAR (National Association of Realtors) wants to be international. It should be International Association of Realtors with fair elections and not dominated by staff members.

Likewise for Royal Institution of Chartered Surveyors which should be International Institution of Chartered Surveyors.

Brokers of All Lands Unite
